PROGRAMMING PROJECTS

Star Wars Order 66 <i>Scratch</i>	2021
My first programming project where I created a game inspired by Star Wars using Scratch.	
Star Wars Datapad <i>code.org</i>	2021 – 2022
Developed an interactive datapad inspired by Star Wars using code.org's App Lab.	
Calculator <i>code.org</i>	2021
Built a functional calculator using code.org's App Lab.	
Periodic Table <i>code.org</i>	2022
Created an interactive periodic table using code.org's App Lab.	
Games <i>code.org</i>	2022
Created Wordle, Hangman, and Checkers using code.org's App Lab.	
Periodic Table <i>Coding Rooms</i>	2023
Built another interactive periodic table using Coding Rooms.	
Datapad — Aurebesh Translator <i>iOS</i>	2023
Created an app to translate and view different types of Aurebesh and Mando'a (Star Wars alphabets), with customizable features for an enhanced user experience. A better, native version of my code.org Datapad.	
Al-Islam — Islamic Pillars <i>iOS</i>	2023
Developed an app with unique features like Traveling Mode and Beginner Quran Mode, designed to assist Muslims (especially converts) deepen their understanding of Islam. The app includes prayer times, the Quran, the basic pillars of Islam, and the Arabic alphabet.	
Islamic Center of Irvine (ICOI) <i>iOS</i>	2023
Developed a comprehensive app providing mosque congregation prayer times, local business information, and community resources for the Islamic Center of Irvine.	
Al-Quran — Beginner Quran <i>iOS</i>	2023
Developed an app to facilitate reading and listening to the Quran, as well as learning Quranic Arabic, featuring Beginner Mode with spaced letters for clarity and the ability to share ayahs as texts and images.	
Al-Adhan — Prayer Times <i>iOS</i>	2023
Developed an app that provides precise prayer times and features a Traveling Mode for shortening prayers while on the go, with a strong focus on privacy ensuring no data leaves the device.	

SKILLS

Computer Science: Proficient in Swift and Java. Experience with JavaScript and Python. Experience with iOS and web app development. Familiar with macOS and Windows.

Math: Proficient in geometry, algebra 1 and 2, pre-calculus, calculus, and statistics.

LANGUAGES

Languages: Fluent in English and Arabic (Egyptian and Modern Standard).
