EDUCATION

University of California, Irvine

Bachelor of Science in Computer Science - 3.72 GPA

Irvine, CA

2024 – 2028

WORK EXPERIENCE

iOS App Development Teacher

February 2024 – Present

STEM Heroes Academy - Muslim Village, Islamic Center of Irvine

- Designed and proposed an iOS App Development course, expanding STEM Academy's curriculum with Swift programming, Swift Playground, and SwiftUI, providing hands-on app development experience for kids aged 8-14.
- Developed a curriculum covering Swift syntax, optionals, structs, classes, and guided students through Swift Playgrounds with UI design using stacks, event-driven programming with gestures, and animations.
- Contributed to STEM Academy's growth as its youngest instructor at 17, inspiring students to explore coding.

Tennis Court Supervisor

Summer 2021

South Orange County Tennis Academy, Coto De Caza

- Supervised tennis courts every weekend, ensuring adherence to rules and maintaining optimal court conditions.

PROGRAMMING PROJECTS

Datapad | Aurebesh Translator | iOS Was #10 on Entertainment on the App Store

2023

- Developed a Star Wars iOS app using Swift and SwiftUI for translating Aurebesh, Mando'a, Outer Rim Basic, and Sith Script, with customizable themes, offline support, and smooth animations.
- Built an interactive alphabet viewer and translation engine with Swift structs and state-driven UI for responsive performance and modular code.
- Implemented an Aurebesh keyboard extension with the Keyboard API and WidgetKit Lock and Home Screen widgets, along with an Apple Watch app using WatchConnectivity for settings synchronization.
- Priced at \$1.99, generating over \$300 in revenue, with a free version available as [Aurebesh Translator](#).

Al-Islam Application Suite | iOS

[GitHub](#) | 2023

- Developed three iOS apps ([Al-Islam](#), [Al-Quran](#), and [Al-Adhan](#)) using SwiftUI, amassing 5,000+ downloads.
- Implemented JSON parsing for Quran data (Arabic and English) with dynamic loading and offline caching.
- Used Core Location and Adhan Package for accurate prayer times with background updates via AppDelegate.
- Built Unique Traveling Mode for shortened prayers, Beginner Arabic Mode with spaced letters, and verse sharing.
- Developed WidgetKit Lock/Home Screen widgets and an Apple Watch app with complications.
- Added online Quran recitations with multiple reciters, supporting chapter and verse playback.
- Won Congressional App Challenge 2023 for Al-Islam and Swift Student Challenge 2024 for Al-Quran.

Islamic Center of Irvine (ICOI) | iOS

[GitHub](#) | 2023

- Developed an iOS app using SwiftUI, providing prayer times, local business listings, and community resources.
- Used SwiftSoup for web scraping ICOI prayer times and events, with daily background updates for efficiency.
- Built a platform connecting the mosque community with Islamic tools, Adhan notifications, and access to local Muslim-owned businesses, using App Groups and App Storage for shared data.
- Achieved 1,000+ downloads in a small community, enhancing engagement and fostering stronger connections.

Sabacc Droid | Discord Bot

[GitHub](#) | 2024

- Built a Python Discord bot for Corellian Spike and Kessel Sabacc with interactive multiplayer gameplay.
- Used discord.py for command handling, event management, and UI components like buttons and embeds.
- Implemented OOP game logic with classes for cards, decks, and players, ensuring modular code.
- Deployed on Heroku for continuous online availability and scalable performance.
- Integrated into 100+ Discord servers, providing multiplayer Sabacc for Star Wars fans.

Other High School Programming Projects | Code.org, Coding Rooms, Scratch

2020 – 2024

COMPUTER SCIENCE SKILLS

Experience in Swift, Python, Java, Javascript, and iOS app development. Familiar with macOS and Windows.
