SUMMARY & SKILLS

Aspiring software engineer specializing in iOS development (SwiftUI) with strong experience in **Swift**, **Python**, **C++**, **Java**, **JavaScript**, and **Bash** across macOS and Windows. Currently an iOS Developer at UCI and iOS App Development Teacher at STEM Academy. Winner of the **Congressional App Challenge 2023** and **Swift Student Challenge 2024**.

EDUCATION

University of California, Irvine
Bachelor of Science in Computer Science – 3.90 GPA

Irvine, CA
2024 – 2028

WORK EXPERIENCE

iOS App Developer

March 2025 – Present

University of California, Irvine — UCI Student Center – studentcenter.uci.edu

- Updated [UCI Now](#) and [ZOTFinder](#) in UIKit with bug fixes, performance boosts, and features via **CocoaPods**.
- Integrated 20+ libraries like **Alamofire**, **SwiftyJSON**, **GoogleMaps**, and **Firebase** to expand functionality.
- Rebuilt both apps in **SwiftUI**, modernizing UI and cutting load times by **40%** with async networking.
- Reduced ZOTFinder crashes by **85%** (from 10.4K to under 1.5K/month) after full code refactor.
- Hit **87.8K installs** / **3.19M sessions** on ZOTFinder and **15.4K** / **39.2K** on UCI Now after SwiftUI remaster.

iOS App Development Teacher

February 2024 – Present

STEM Heroes Academy — Islamic Center of Irvine – stemirvine.com

- Launched and taught a new **iOS App Development** course using **Swift**, **Swift Playgrounds**, and **SwiftUI**, enabling 30+ students (ages 8–14) to build functional iOS apps with interactive UIs and animations.
- Taught 15+ custom lessons on **Swift**, guiding students through UI design and animation projects.
- Boosted student engagement and retention by **40%** through hands-on projects, live demos, and feedback loops.
- Became STEM Academy's **youngest instructor** at 17, contributing to course expansion and enrollment growth.

PROGRAMMING PROJECTS

[Datapad](#) | [Aurebesh Translator](#) | iOS *Top 10 on App Store Entertainment Chart* [GitHub](#) | 2023

- Built and published my first and most ambitious iOS app using **SwiftUI**, translating English to Aurebesh, Mando'a, Sith Script, and Outer Rim Basic, with offline support, smooth animations, and a fully custom UI.
- Earned **\$1K+** from **25K+** installs, powering **60K+** user sessions of Star Wars translation.
- Built a modular **translation engine** and **alphabet viewer** using state-driven UI for responsiveness.
- Shipped an **Aurebesh keyboard**, **WidgetKit** widgets, and Apple Watch support via **WatchConnectivity**.
- Released a free version, [Aurebesh Translator](#), reaching 6,000+ users and achieving a **99.9% crash-free rate**.

[Al-Islam Application Suite](#) | iOS [GitHub](#) | 2023

- Built **three full-featured SwiftUI apps** — [Al-Islam](#), [Al-Quran](#), and [Al-Adhan](#) — with dynamic verse loading, widgets, Qibla compass, and prayer notifications, reaching **15,000+ users** and **55,000+ sessions**.
- Implemented **JSON parsing** for Arabic/English Quran data with offline caching, reducing load time by **50%**.
- Created **Beginner Arabic Mode**, **Traveling Mode**, and online chapter/verse playback with multiple reciters.
- Hit **99.8% crash-free rate**; won **Congressional App Challenge 2023** and **Swift Student Challenge 2024**.

[Islamic Center of Irvine \(ICOI\)](#) | iOS [GitHub](#) | 2024

- Developed the official ICOI app in **SwiftUI**, with real-time prayer times, mosque events, verified announcements, and business directories in a mobile-first design—streamlining access to key services and boosting engagement.
- Integrated **SwiftSoup** for dynamic web scraping and used background tasks for efficient daily data sync.
- Engineered a full-stack platform with **mosque prayer alerts**, Islamic tools, and a searchable Muslim business directory using **App Groups**, shared storage, and modular SwiftUI components to boost daily engagement.
- Reached **2K+ downloads** with over **35K+ sessions**, transforming community outreach and mobile engagement.

Star Wars Discord Bots | Python, C++

2024, 2025

- Developed [Sabacc Droid](#) (Python) and [Aurebesh Droid](#) (C++), growing usage to **500+ Discord servers** by delivering immersive Star Wars games and language tools with slash commands, buttons, and rich embeds.
- Used **discord.py** and **D++** to build modular bot frameworks with reusable commands and event-driven logic.
- Achieved 99.9% uptime by deploying to **Heroku** and automating **GitHub Actions** builds for seamless updates.
