EDUCATION

University of California, Irvine

Irvine, CA

Bachelor of Science – Computer Science (3.90 GPA)

Expected June 2028

- **Awards:** Apple Swift Student Challenge Winner (1 of 350 worldwide), Congressional App Challenge Winner
- **Teaching:** Launched [STEM Heroes Academy](#)'s first App Development course as its **youngest instructor** at 17, teaching 30+ students (2024–2026)
- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Data Management (SQL), Artificial Intelligence, Information Retrieval, Object-Oriented Programming, Discrete Mathematics

WORK EXPERIENCE

Lead iOS Developer

March 2025 – Present

UCI Student Center & Event Services | studentcenter.uci.edu

Irvine, CA

- Own and ship three App Store apps: **100K+ installs**, **3.2M+ sessions** ([UCI Now](#), [ZOTFinder](#), [Esports](#)).
- Shipped **UCI Esports** as **sole iOS developer**: a **15K-line SwiftUI** app with **single sign-on**, live **REST** reservations, and a **Node.js** backend I wrote.
- Lead a **4+ person Android team**, running hiring, technical interviews, and code review.
- Own the **AWS** infrastructure and backends behind the department's apps, and ship all releases through **App Store Connect** and **TestFlight**.
- Cut load times **40%** rebuilding two **UIKit** apps into **SwiftUI** with **async/await structured concurrency**, extending both to **iPad**, **Mac**, and **Vision Pro**.
- Cut crashes **85%** (10.4K to under 1.5K/month) refactoring a decade-old **UIKit** codebase with **20+ CocoaPods** dependencies (**Google Maps**, **Firebase**).

Lead Software Developer

February 2026 – Present

ICS Student Council (ICSSC) | studentcouncil.ics.uci.edu

Irvine, CA

- Lead a **12-person engineering team** building **PeterPlate**, ICSSC's open-source campus dining platform, **live in production** on web and iOS, serving menu, allergen, nutrition, and ratings data.
- Built a type-safe **Next.js (React)** + **TypeScript** frontend and a serverless **tRPC/PostgreSQL** backend on **AWS**, shipped via **GitHub Actions** CI/CD.

PROGRAMMING PROJECTS

[Al-Islam App Suite](#) | *SwiftUI, Kotlin* *Congressional & Swift Student Challenge Winner* [GitHub](#) | 2023

- Built **three open-source apps** ([Al-Islam](#), [Al-Quran](#), [Al-Adhan](#)) for iPhone, iPad, Mac, and Watch, serving **15K+ users** across **55K+ sessions** at **99.8% crash-free**.
- Cut load times **50%** with offline **JSON** parsing, **SwiftSoup** scraping, and on-device caching, and maintain all three from one shared codebase with a **3-way-merge** sync tool that ports changes between them.

[Datapad & Aurebesh Translator](#) | *SwiftUI, React, PWA + Android* *Top 10 Entertainment* [GitHub](#) | 2023

- Published my first app at 17 and grew it into free and premium tiers earning **\$1K+** from **25K+ installs** at **99.9% crash-free**, spanning iPhone, iPad, Mac, and Watch.
- Wrote a **1,400-line computer vision engine** decoding photographed glyphs with no trained model: adaptive thresholding, connected-component segmentation, and multi-signal template matching.
- Ported the suite to **React 19** and **TypeScript**, shipping an offline **PWA** and an **Android** build via **Capacitor** from one codebase.

[Star Wars Discord Bots](#) | *Python, C++20, Linux* *500+ Servers*

[GitHub](#) | 2024 – 2025

- Grew [Sabacc Droid](#) (Python) and [Aurebesh Droid](#) (C++20, CMake) to **500+ servers** with a concurrent 8-player engine, at **99.9% uptime** on **Linux**.

LANGUAGES & TECHNOLOGIES

Languages: Swift, Objective-C (reading), Kotlin, TypeScript, Python, C++ (C++20), SQL, Bash

Apple Frameworks: SwiftUI, UIKit, WidgetKit, StoreKit, WatchConnectivity, MapKit, CoreLocation, AVFoundation, Combine, Swift Concurrency

Tools: Xcode, App Store Connect, TestFlight, Instruments, CocoaPods, Swift Package Manager, Git, GitHub Actions (CI/CD), Firebase, AWS
